
menu not fit together

Posted by chriske81 - 2014/11/06 17:20

Hi,i have install the ARI ext menu module in joomla 3.6. I get the menu blocks not against each other. do you have an idea for? I have already tried everything but get this not ready, also the submenu items are there very strange on. above the banner you see this I want to replace the normal menu by your menu because it works better.Can you help me please? Thanks.

Hello,

This problem with site template styles. Add the following CSS rules to "CSS Styles" parameter in module settings to resolve the problem:

```
.ux-menu LI:before {display: none !important;}
.ux-menu UL,
.ux-menu LI {padding: 0 !important;margin: 0 !important;}
```

Regards,
ARI Soft
