# Sub-menu sometimes appearing, sometimes not in J3
Posted by zeebee - 2014/11/25 13:39
_____

Hi, I have Ari Ext Menu running two menus and Ari Image Slider. One menu works perfectly, one menu intermittently displays correctly then other times only displays one sub-menu item?
I have tried turning on and off the jQuery load options and On Load/DOM Ready, turned all calls for jQuery to off and added a call direct to my index.php with no success.
The menu and sub-menu items have been completely re-built, can you help please?
This is the development site
http://188.39.142.202/index.php?option=com_content&view=category&layout=blog&id=12&Itemid=108 it's the menu top right 'language'

Hello,

The same module instance are loaded twice on the page. It can be a problem in site template.

Regards,
ARI Soft

_____

Check code in site template which is used to load modules for the selected module position.

Regards,
ARI Soft
