
ARI Ext Menu changes width before load

Posted by motion2082 - 2014/11/26 11:12

Hey guys,

Great extension you have but I have noticed the styling behaves funny on the site Im developing
<http://tinyurl.com/p2le55u>

Any tips on how to fix this glitch?

Hello,

Could you send an image with comments where we can see what do you want to change?

Regards,
ARI Soft

Looks like it's working ok

Is there a way to make the > transparent or remove completely?

Add the following code to "CSS Styles" parameter in module settings:

```
.ux-menu-arrow {display:none !important;}
```

Thank you for your assistance, very happy with your service.

Have one more question, is it possible to add a green background below the menu like this website has?

If you want to change background color for specific menu item, it requires to add a custom CSS rule(s). You can read

here about menu HTML layout and CSS classes.
