## Menu level 3 does not show

Posted by genealogist - 2014/12/08 11:33

---

I use ARI Ext Menu here at [www.genealogysa.org.au](http://www.genealogysa.org.au). Most of the site uses custom CSS. Level 1 and 2 show ok, but I cannot get any level 3 menus to appear. Can you help please?

Hello,

This problem with your custom CSS rules in template.css file:

```
.ux-menu-sub {  
    border-radius: 0 0 4px 4px;  
    box-shadow: 0 0 4px rgba(73, 63, 57, 0.5);  
    overflow: hidden;  
}
```

remove overflow:hidden property.

Regards,  
ARI Soft

:) That did it, plus clearing my cache. Thank you very much.
