_____

Add the following CSS rule to "CSS Styles" parameter in module settings:

DIV.ux-menu-container {
 background: transparent url(/modules/mod_ariextmenu/mod_ariextmenu/js/css/images/menu-item-bg.png) repeat 0 0;
}

Hi,
does it work for joomla 2.5? I've put the above css rules in module settings under css styles, but still have the same width as before changes. What else can i do?

Regards

_____

Hello,

Is it possible to see the problem?

Regards,
ARI Soft

_____

Sorry for the late response,

the link is http://joomlasm.co.nf/
it is a test page and i want to have a full width of the horizontal menu bar (regardless of the menu items), if it is possible.

Regards,
Spyros

_____

The extension doesn't support ability to change menu items to fill all available space. Menu items width can be set manually. You can read here how to do it.
