Menu disappears behind mod_rokstories in IE8

Posted by timread - 2010/07/04 18:19

_____

Hi there,
your vertical Ari Ext menu won't show in front of mod_rockstories in IE8. It works fine in Firefox.
Horizontal one works fine too.
Could you let me know what mod I need to make to get it to appear?

The site I'm working on is here: http://brouardarchitects.co.uk/new2/ The 'Services' tab should show sub menus

Thanks!
Tim

_____

Hello,

This problem with site template CSS styles. Add the following CSS rule to template CSS file that fix this issue:

.col2 #leftcol .moduletable .module-inner
{
  overflow: visible;
}

Regards,
ARI Soft

:) Wow! Fantastically quick response, and on a Sunday evening!! - works great.
I'm definitely going to recommend you guys when I can.
thanks
Tim
