## ARI Ext Menu looks like standard Joomla! Menu

Posted by LeCrozat - 2015/01/23 08:53

---

Hello,

I've made my own small template and want to use your "ARI Ext Menu".

My problem: The menu looks like the normal Joomla Menu. I think, the problem is my css style (see attached file <http://www.ari-soft.com/images/fbfiles/files/formate.zip>)...

Can you help me?

I use Joomla! 3.3.3

You can see my testsite here.

Thanks!

Regards,  
Hartmut

Hello,

Check that your site template contains `<code>` between `</code>` and `</code>` tags.
