
Dissable-make a main menu topbutton unclickable

Posted by ian10 - 2010/07/08 07:42

ARI Ext Menu

I want to make a top-menu button unclickable while its sub buttons stay unchainged.
I've been searching for some time how to make each main button unclickable, except from the "home" top menu button, but unfortunately haven't found anything yet.

a temp version fo the site is : joomla7.thisgr.com

Kind regards

=====

If you want to do a parent menu item is unclickable, set 'Menu Type' for menu item to 'Separator' in Joomla! menu manager.

Regards,
ARI Soft
