Vertical Menu not working

Posted by classic - 2010/07/14 15:01

_____

Hello,
My menu will not work at all. The links show up in list form. I have the module enabled and I haven't touched the CSS. Is there any code or anything I need to add to the html to get it to work?

Hello,

Provide link to page where we can see this issue that we can help you.

Regards,
ARI Soft

Wow, fast response! There's the link, you'll see that the links are just listed.

Thanks! :)

_____

It seems template index.php file doesn't contain the following code:

Place this code between and tags and everything should work fine.
