## Problem with top menu and submenu

Posted by dadoen - 2015/06/03 09:11

---

On the website

<http://www.triniti.rs/baterije-1/baterije-za-kadu-2>

First problem

you can see, top menu go in the back side of ARI Ext Menu ( left position ), and can not see submenu of top menu

Second problem

Submenu of ARI Ext Menu, when first time , submenu shows ok, but when you click on the some submenu item and website loading, after this submenu not show corectly. When I clear cash , again submenu look fine, but after this not shown corectly.

Hello,

The same javascript code (not only for "ARI Ext Menu") is included twice. You can see it if open HTML source of the page. It seems this is a problem with Joomla! cache.

Regards,  
ARI Soft
