Hi.

I need some help

On my main site i have a menu on the right of the site but i can not get the same menu on some of the pages. I can not get it by Module Manager: Modules http://www.ari-soft.com/images/fbfiles/images/Uden_navn_2.jpg

Hello,

Could you provide link to page(s) where the problem occurs?

Could you provide a temporary access to your J! backend by email so we can investigate the problem? It seems this is a problem with "Show only active sub-menus" parameter (try to set it to "No") or parameters on "Menu assignment" parameters tab on module settings page.

Try now. We installed the latest version of the extension and changed selection in "Menu assignment" parameters section.
