
Menu version totally horizontal...

Posted by Katfun - 2010/07/19 15:18

Hi there

I've implemented this menu on my website, didn't have much problem installing it and also did some css change based on some threads posted here before.

My question is:

is there a way to instead of the submenus (level 1 or 2) appears vertically, could it appear horizontally?

Could this be done using CSS (i've tried to apply and inline style but didn't work) or only changing the code?

=====

Hello,

Unfortunately the menu can't work in this way. It requires changing the code.

Regards,
ARI Soft
