Drop Arrow over menu text

Posted by brammers - 2010/07/19 19:57

_____

Firstly I would like to say hi,

I am new to this so I will try not to annoy.....

I have installed the ARI Ext Menu module and configured and everything is working well I have even changed the background colour, which I was happy I had managed to do!!

The only two issues I have is that the menu (horizontal top) is now across on the left (but this could be a joomla config issue rather than ARI) and the main issue I have is that the little drop down arrow for the menu items with sub items is sitting on top of the text on the main menu item across on the right of the hover area but still on top of the text.

is it something I have done / not done or something else?

Any pointer great received.

Regards

_____

Hello,

Provide link to page, please, where we can see this issue because it seems like a conflict with site template styles.

Regards,
ARI Soft
