
Major Issue with Menu

Posted by TOTKO - 2016/08/10 13:30

I cannot be certain when the issue developed but I believe it was when I upgraded to 3.6.1.

When the module is Published I see two menu items and nothing else from the template. When Unpublished the template works as expected.

Are you able to advise?

Thanks

Tony

The issue is not limited to this menu extension - others I've now tried also fail.

I am now at a complete loss!

Hello,

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate it?

Regards,
ARI Soft

Hi

Happy to. Do you have an email address I can send login details to?

www.csdg.co.uk/site/ is the live address and Ari Ext Menu is currently Published.

Hello,

This problem with "com_eventbooking" extension. The following PHP error occurs:

Fatal error: Cannot redeclare EventbookingBuildRoute() (previously declared in /home/sites/csdg.co.uk/public_html/site/components/com_eventbooking/router.php:14) in /home/sites/csdg.co.uk/public_html/site/components/com_eventbooking/router.php on line 239

Regards,

ARI Soft
