menu alignment

Posted by dreamtime - 2016/08/24 15:26

_____

thank you for this extention, I installed it on a j!3.5 and it is nice to use, but I couldn't be able to center the menu bar in the (responsive) page.
Could you help me please?
I'm using a Artisteer 4 responsive template. Also, if possible ,I would like to have the background color on the whole menu line.
I attached two images to try to explain better.
Thank you very much for your assistance! http://www.ari-soft.com/images/fbfiles/images/extmenu.jpg

_____

Hello,

Could you provide a link to a page with the menu?

Regards,
ARI Soft

_____

Hello,
thank you for your answer.
The project started now; it is online, but it is under password. I can give passwords to you but only in PM. I can give you the template if needed.
Thank you again
