Dear,
my problem is this: if I look at my site, where it is installed Ari menu, from a smart phone can not see the bottom of a menu item. http://www.ari-soft.com/images/fbfiles/images/Screenshot_2016_10_02_09_02_53.png

Hello,

3rd level menu requires more width than available on a mobile device. Sorry, but the module doesn't provide any fallback for this situation.

Regards,
