Menu issue in Safari

Posted by crlanier - 2017/02/07 00:44

I'm using Joomla 3.6.5 and ARI EXT Menu, the menu works great except in Safari for some reason. All of the menus are expanded and off to the side (screen shot attached).

Website is http://www.lascrucesassociationofrealtors.com

Do you have any ideas why it wouldn't work in Safari?

Thanks.

Hello,

Could you send a screenshot by email?

Regards, ARI Soft
