## ARI MENU JAGGED EDGES?

Posted by Collin - 2017/02/14 21:51

---

Hello,

Ari Menu is amazing - however I have come across a problem today - the menu is 'jagged' not square and not sure why this is happening. Any advice or help is MUCH appreciated.

Here is a snapshot of my menu...

Thank you so much in advance! [http://www.ari-soft.com/images/fbfiles/images/Snap\\_2017\\_02\\_14\\_at\\_16.jpg](http://www.ari-soft.com/images/fbfiles/images/Snap_2017_02_14_at_16.jpg)

Hello,

Check that "Auto width" parameter is set to "Yes". If it doesn't help, provide a link to a page where the problem occurs so we can investigate it.

Regards,  
ARI Soft

Hello, Thank you so much for your fast reply. the Auto Width is set to yes. This was working fine initially. Perhaps I may have a plugin conflict? Have no idea.

Here is a link to the page: <http://www.thestrokefoundation.com/>

Thank you and Kind Regards

Hello,

This problem with your site template or 3rd party plugin. All including of javascript files which are done via Joomla! API are removed.

Regards,

Ok - this is odd. I placed my google analytics code in the head of my php template and this is when the ari menu went weird. Having a look at my template php file just now it was missing the tag. Once I added that back the ari menu problem I was having is solved!! Don't know how I figured this out, but thank you SO much for leading me in the right direction.

Problem solved!

---

Best regards to you and your extension is amazing! Thank you SO much!
