
How to switch sub-item position on mobile

Posted by LMKWebDesign - 2017/02/22 15:05

Hello, Right now I'm using the menu in a vertical format with the sub-items flying out to the right. However, that means they are not visible on mobile devices. Is there any way to change the sub-items to display vertically below the main item on mobile devices? The menu is visible here: <https://newfoundva.org/newfound-resources/newfound-navigation>

Hello,

Sorry, but the extension doesn't support this ability.

Regards,
ARI Soft

OK thanks, I'll see if I can hide the menu on mobiles and use an alternative option.
