
Menu dropdown not working

Posted by laurence mcleod - 2017/03/01 01:22

Hello. My menu is showing arrow on the side indicating sub menu item but it is not displaying the sub menu.

The site is at veecantadeu.com (have just left one item as dropdown for now)

Thanks

Hello,

The page contains an incorrect javascript code which prevents execution of all javascript code which is added via Joomla! API. It seems the problem with an extension (or site template) which adds the following code:

Thanks very much for your reply. That was indeed the problem and all is working great now.

cheers
