Download link for ARI Ext Menu broken

Posted by sidney1310 - 2017/04/28 22:47

_____

I tried to download from http://www.ari-soft.com/Joomla-Components/ARI-Ext-Menu/Detailed-product-flyer.html

Clicking on the link there that says Download ARI Ext Module gets me a page that says

You can't download the file directly. Visit download page, please, that download the file.

I can't find a separate download page.

Help?

Update:

All of a sudden it works! This was after many tries on two different computers with and without logging in to the site. I guess it just needed me to post a complaint :)

_____

Hello,

Thank you for your message. We checked it in different browsers and the module is downloaded fine. We will investigate this problem further.

Regards,
ARI Soft
