
Height of the menu

Posted by sypou - 2010/08/04 09:17

Hi again,

Is it possible to change the height of the menu. By default, it is like 34 px. is there any way to change it to 25 px.

And how to change the placement of the text to be more high, because when reducing the height of the menu, the text will not be in the middle anymore.

Thank you,

Sypou

Use the next CSS rules:

```
.ux-menu-container .ux-menu a
{
padding: 5px 14px;
}
```

```
.ux-menu-container .ux-menu .ux-menu-arrow
{
top: 9px
}
```

Regards,
ARI Soft
