how can i remove the 1px space between menu-levels

Posted by ayko - 2010/08/06 00:09

_____

Hi,

first of all. very nice menu! Thanks for that.

I've installed the module and set:

Show only active sub-menus   yes

Delay   0
z-Index   100
Assets loading method inline
Generate unique ID   no
Auto width   yes
Transition type   slide
Transition duration   0.2
Animate   no
Font size   22px
Font weight   normal
Text transform   Capitalize
Menu direction   Horizontal

I changed CSS-file to my look, but there is always this 1px space between my horizontal menu and the vertical submenus like on your demopage: http://www.demo2.ari-soft.com/ari-ext-menu.html

I've tried to change it with firebug on your demopage too, but there are still 1px space between.

How can i remove this gap?

best regards
Frank http://www.ari-soft.com/images/fbfiles/images/1px_border_ari_ext_menu.jpg

_____

Hello,

Provide link to page, please, where we can see this issue. It seems this problem with site template styles.

Regards,
ARI Soft

_____

Try to add the following CSS rules:

body .ux-menu-container ul li
{
  margin-bottom: 0;
}

I was wondering the same thing and implemented your css edit but it did not remove the 1 pixel gap between menus like is shown on the demo page. Any other edits I could make?

_____

simply add:

.ux-menu,.ux-menu ul{
 margin:-1px;
 ;

_____

Use the following CSS rule:

.ux-menu-container .ux-menu .ux-menu-sub .ux-menu-sub
{
  margin-left: -1px;
}

Regards,
ARI Soft

_____

It works also with the css you provided first. I didn't put the saved menu.min.css in the right place on the server after editing it. My bad, thank you very much!!

Actually, the method that helped me is defining the margin at -2px like this
----
body .ux-menu-container ul li
{
  margin-bottom: -2px;
