
Menu Width and Spacing

Posted by greinert - 2017/12/21 14:34

First question:

Using a vertical menu.

How can I set or limit the width size?

Second question:

Using a vertical menu.

The menu is touching and/or covering some of the article text content.

How can I ensure the menu does not touch or cover the article text content?

Hello,

Could you provide a link to a page with the menu?

Regards,

ARI Soft

Set "Auto width" parameter to "No" and populate "CSS Styles" parameter with the following code:

```
.ux-menu-item-main {width: 200px;}
```

Sorry, but the result is not what I'm looking for.

Instead of having a nice neat menu box, the result is a jagged shape menu.

<http://www.ari-soft.com/images/fbfiles/images/autosnap.jpg>

Is there any way to get the nice rectangular box like shown under the original question?

It looks fine on our side:

<http://www.ari-soft.com/images/fbfiles/images/menu-f0536e8b53314034fad5b1142cb122dc.jpg>

Check that the correct code is added to "CSS Styles" parameter.

Regards,
ARI Soft

That's because I made the changes ... got the jagged menu box ... and removed the changes to get it back to normal.
