
Horizontal Sub-Menus Disappearing When Cursor On

Posted by msdundar - 2010/08/18 22:06

Hi I'm using ari-ext menu, and I'm thankful to you for developing this nice module for free.

But I have a problem.

I can use my menu properly with firefox but I can't say something for IE.

In IE (old and new versions) my horizontal sub menus disappearing too fast when my cursor on them.

I checked the forum and I added some css codes to my css files. I added this codes :

```
#body .tail-row-logo,
#body .tail-row-logo .row-logo
{
    overflow: visible;
}
```

```
body UL.ux-menu LI
{
    padding-left: 0;
}
```

```
#left_L .inside .moduletable
{
    overflow: visible;
}
```

```
#mainbody_L #left_L
{
    overflow: visible;
}
```

But they didn't worked. Sub Menus are still disappearing too fast in IE.

You can check my page : <http://sksdb.omu.edu.tr/>

The Sub-Menus with problems : "Odari Bilimler", "Bar1nma", "Đi renci"

Also you can check my conf. :

Hello,

Try to use the next CSS rule:

```
.ux-menu-container .ux-menu .ux-menu-sub A
{
    position: static;
}
```

PS: It seems the module can't install language files because /language/en-GB folder on your server doesn't have writable permissions.

Regards,
ARI Soft
