
change menu color

Posted by zonedabone - 2010/08/23 23:31

Hi! I just want to say that I've had great luck with ARI menus where others failed. Now, I have another question. Is there a way to change the color of ariextmenu to match my site's theme? I'm using ja_purity, and after fixing the submenu location, this is all that I have to do. the site is at rivertraders.net. Just a simple css code would be great. ;)

Thanks in advance!

P.S. While I'm at it, I'd like to remove the 1px padding between the nav bar and the submenu, because putting the mouse there can close the menu. This also needs to be fixed on sub menus of sub menus. (You can see it on my site.)

Hello,

Use the next CSS rule that remove 1px padding:

```
#ja-mainnav .ux-menu-container .ux-menu .ux-menu-sub
{
    margin-top: -1px;
    margin-left: -2px;
}
```

About the menu colors, provide information how it should look (screenshot with updated menu for example).

Regards,
ARI Soft

Ok! In order to blend in with ja_purity, I need the menus and submenus to have a background of #444444. I could edit the background images in the css/images directory, but I'd rather not have everyone loading as many images. Highlighted items could just be #666666, and the current should be #777777. I was able to get the highlighted ones to change, but it involved editing the css file, and I'd like to limit it to rules in the module css box, in case I want to use the menu again.

Add the following CSS rules:

```
.ux-menu-container .ux-menu A
{
    background: #444444 none;
}

.ux-menu-container .ux-menu A:hover,
.ux-menu-container .ux-menu A.ux-menu-link-hover
{
    background: #666666 none;
}
```

}

.ux-menu-container .ux-menu A.current

```
{
  background: #777777 none;
}
```

Sorry for splitting my stuff up so much, but I have a few more requests from users. I need to make all the menu items half their current height. Also, I'd like the borders to be changed to #555555. I think I know how to modify the above rules to fix the border, but I have no clue how to do height.

EDIT: Modifying the border property on all of the rules you gave me cause some glitches. I'll stick with the current for now, unless you know how to fix that.

Re:change menu color

About the border specifics, I'd like no top or bottom border on main menu items, but on subs and L/R borders I'd like it to be #555555

Re:change menu color

Posted by admin - 2010/08/25 06:47

Add the following CSS rules:

```
#ja-mainnav .ux-menu-container a
{
  line-height: 10px;
}
```

```
#ja-mainnav .ux-menu-container .ux-menu a
{
  border-top-style: none;
  border-bottom-style: none;
}
```

```
#ja-mainnav .ux-menu-container .ux-menu .ux-menu-sub a
{
  border-left-color: #555;
  border-right-color: #555;
}
```

Thanks so much! It's awesome now, and blends in perfectly with my site! I just had to copy the css from the sub container you posted to the main container, so tht my main menu items had the right styling. I guess it gave me a pinch of css experience! Thanks so much again!

You can add CSS rules from this post to 'CSS Styles' parameter in module settings or any CSS file which is included into the page and it will work.

thanks for the tips, however it still doesn't look right...

is it possible to customise it to be like this top menu from this page: http://osc4.template-help.com/joomla_28627/index.php?option=com_content&view=section&layout=blog&id=1&Itemid=55

thanks loads

Menu which is located on provided site uses images as background. Background images for 'ARI Ext Menu' is located by the following path:

/modules/mod_ariextmenu/mod_ariextmenu/js/css/images/

You can modify it for your needs.
