How to make sub drop down menus ..
Posted by jaunty_mellifluous - 2010/08/26 19:18
_____

I installed the MOD and created a horizontal menu. I can see all the menu items from my menu.

 I just wanted to know how to make sub menus for each menu item so that when a user hovers onto them a menu bar drop down?

_____

Hello,

Create sub-menu items in Joomla! menu manager.

Regards,
ARI Soft

_____

Open 'Menu -> ' page on the Joomla! backend. is name of necessary menu. Click 'New' button, choose appropriate menu item type, select parent menu item in 'Parent Item' select box. That's all.

Regards,
ARI Soft
