## ARIHTMLHelper throwing exception

Posted by fdinkler - 2020/08/05 17:13

---

Using ARIExtMenu, seeing this entry in the error logs:

CAUGHT EXCEPTION: Non-static method AriHtmlHelper::getAttrStr() should not be called statically in /home/fdinkler/public\_html/modules/mod\_ariextmenu/tmpl/menu.php on line 103

Any update that fixes this?

Thanks,

JM
