
Sub menu not visible

Posted by dacode - 2020/10/15 19:17

Hello,

I also have the problem, that a sub menu isn't visible on a site.

I have the impression, that it has something to do with the "ux-menu-init-hidden".

link1

link2

link3

Unfortunately I cannot access the template, so I have to deal with the possibilities given in the ARI Ext Menu. The code you see in the css-styles textfield was a try to make the submenu visible.

I could send you a link to the site.

Hello,

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

Hello,

thank you for your answer, I already thought your page was down...
I can send you a link per mail.

Hello,

Send it to this email.

Regards,
ARI Soft
