
How To Hide Sub-menu

Posted by ad1234 - 2010/08/30 23:00

Hello,

I have just installed the menu and I'm having trouble getting it working. I would like the submenu to only be displayed on rollover of that topic and it's displaying all the time, and behaving strangely. I am using the beez template.

If you could take a look where I'm working on the site:
<http://www.temp.artandsoulacting.com>

Thank you

Hello,

Sorry, but we don't see the menu by provided link.

Regards,
ARI Soft
