How To Hide Sub-menu Posted by ad1234 - 2010/08/30 23:00
Hello,
I have just installed the menu and I'm having trouble getting it working. I would like the submenu to only be displayed on rollover of that topic and it's displaying all the time, and behaving strangely. I am using the beez template.
If you could take a look where I'm working on the site: http://www.temp.artandsoulacting.com
Thank you

Hello,
Sorry, but we don't see the menu by provided link.
Regards, ARI Soft
