how to hide list dots?

Posted by gd003 - 2010/09/02 14:21
_____

hello,

i like this menu, but theres a problem.
the menu works fine, but on the left side and also on the submenus there are list style? dots and i dont know how to hide them.

http://img823.imageshack.us/img823/4594/menudots.jpg

i found this in the css of the template

```
ul li {
 background: url(../images/bullet-list.gif) no-repeat 0 5px;
 padding-left: 20px;
 margin-left: 10px;
}
```

but i cant delete it because i need the bullets on some other things, but i wanna hide them only on the menu.
hope you can help me.
thanks in advance!

_____

hey,

Unfortunately the side is offline, i work on it with xampp.
seems that the menu use the list style (bullets) out of the template css.
but why? :) can i prohibit the menu to use the list?

thanks

_____

It can occur if site template styles use more weight CSS selector. For example use element ID in CSS selector.

Hi. I have the same problem. Could you please be more specific, like with a sample of who to do so; what code, and in what file(s)?

Sorry, but, how to use element ID in CSS selector?

_____

Hello,

If you want to use menu container id in CSS selector, use the following placeholder #{$id} in 'CSS Styles' parameter in module settings. It will be replaced with menu container id.
