## Verticle menu display problems

Posted by nicotraut - 2010/09/03 09:26

---

Hi, I have a different problem with the menu now. The width of the menu buttons aren't the same on all the pages and on some of the pages the sub menus of my "our clients" button aren't sliding out and displaying like it is supposed to. How can I fix this?

Thanks for your support.

---

Try to add the next CSS rule:

```
.art-sidebar1 UL.ux-menu-vertical LI
{
  float: none;
}
```

When we apply this CSS rule, the menu looks like on screenshot:

<http://www.ari-soft.com/images/fbfiles/images/menu-13d2024d83d13d4574ad489bf60cef0c.png>

Is it incorrect?

---

yes when I apply it it also looks like that but then it does not function properly on some of the pages the menu buttons are stretched all the way across the page and the buttons of the submenus doesnt slide out.

Hi i put the code back in the template css so go have a look.  
home page, notice that the submenus of the "our clients" tab are not sliding out.  
[http://www.visualsportstalent.co.za/index.php?option=com\\_content&view=article&id=30&Itemid=1](http://www.visualsportstalent.co.za/index.php?option=com_content&view=article&id=30&Itemid=1)

on the "about vst" page, "our clients" page and the "news" page the menu is stretched all the way across the screen:  
[http://www.visualsportstalent.co.za/index.php?option=com\\_content&view=frontpage&Itemid=2](http://www.visualsportstalent.co.za/index.php?option=com_content&view=frontpage&Itemid=2)  
[http://www.visualsportstalent.co.za/index.php?option=com\\_content&view=frontpage&Itemid=3](http://www.visualsportstalent.co.za/index.php?option=com_content&view=frontpage&Itemid=3)  
[http://www.visualsportstalent.co.za/index.php?option=com\\_content&view=frontpage&Itemid=5](http://www.visualsportstalent.co.za/index.php?option=com_content&view=frontpage&Itemid=5)

On the "contact us" the sliding function is also not working when you mouse over the "our clients" page.  
[http://www.visualsportstalent.co.za/index.php?option=com\\_contact&view=category&catid=9&Itemid=6](http://www.visualsportstalent.co.za/index.php?option=com_contact&view=category&catid=9&Itemid=6)

Any suggestions? :unsure:

---

Try the next CSS rule:

```
.art-sidebar1 .ux-menu-vertical,  
.art-sidebar1 .ux-menu-vertical .ux-menu-sub  
{  
width: 100% !important;  
}
```

```
.art-sidebar1 .ux-menu-vertical LI  
{
```

---

width: auto !important;  
}

---

that code worked except for the home page and contact page.

[http://www.visualsportstalent.co.za/index.php?option=com\\_content&view=article&id=30&Itemid=1](http://www.visualsportstalent.co.za/index.php?option=com_content&view=article&id=30&Itemid=1)

[http://www.visualsportstalent.co.za/index.php?option=com\\_contact&view=category&catid=9&Itemid=6](http://www.visualsportstalent.co.za/index.php?option=com_contact&view=category&catid=9&Itemid=6)
