## Drop-down sub-menus never disappear

Posted by jbartlett - 2010/09/08 03:58

---

Hi! I'm a newbie at this, and I just installed ARI Ext Menu on our site.

I'm using the Beez template .

The drop-down sub-menu just stays there. When I mouse over the parent ("about"), they briefly disappear to do their animation thing, but they never disappear. I've already tried the "Show only active sub-menus" item in the module; it's set to yes but makes no difference either way.

Can you help me?

Thanks!

Also - the regular main menu, with the same location set (user3), appears "right-justified", but with ARI Ext Menu I can't get it to do that; it wants to be left-justified.

Hello,

This problem with site template styles. Add the next CSS rules:

```
#header ul.ux-menu li a.ux-menu-link-parent:link,
#header ul.ux-menu li a.ux-menu-link-parent:visited
{
    padding-right: 24px;
}
```

```
#header .ux-menu ul.ux-menu-hidden
{
    display: none;
}
```

```
#header ul.ux-menu,
#header ul.ux-menu ul
{
    margin: 0;
    padding: 0;
}
```

```
#header ul.ux-menu li a:link, #header ul.ux-menu li a:visited
{
    padding: 5px 14px;
}
```

Regards,  
ARI Soft

Awesome, that fixed the drop-downs; thanks!

Any way to move it over to the right side instead of the left?

Also - any way to make the sub-menus the same width as their parent?

And finally, which CSS document do we need to change to adjust colors?

Thanks again!

---

Add the next CSS rule:

```
#header .ux-menu-horizontal
{
    float: right;
}
```

Awesome, that moved it to where I want it!

Can we do one more? How do I make the sub-menus take up the same width as their parent?

Thanks again!

Try the following CSS rules:

```
#header .ux-menu-horizontal .ux-menu-sub,
#header .ux-menu-horizontal .ux-menu-sub LI
{
    width: 100% !important;
}
```

```
#header .ux-menu-horizontal .ux-menu-sub LI
{
    float: none;
    display: block;
}
```
