Vertical menu width problem .

Posted by tomzoll - 2010/09/09 06:33

_____

Hello. I have a problem with the main vertical menu. Items that do not have submenus take the width specified in the css file. However, those items have a submenu are always longer than item which don't have submenus. How do I determine the width of both items? Thank you.

www: wiw.kielce.pl/indexx.php

Ps. sorry for my english :)

_____

Hello,

This problem with your site template styles and custom styles which you have added. Remove this style:

```
.ux-menu-container .ux-menu a
{
  width:161px;
}
```

and add the next CSS rule:

```
#left .moduletable {
 margin-right: 8px;
}
```

_____

Use the following CSS rules:

```
#left .moduletable {
 margin-right: 8px;
}

#left .ux-menu,
#left .ux-menu li
{
  width: 100% !important;
```

}

_____

Try to use the following instead of the previous CSS rules:

```
 #left .moduletable {
 margin-right: 8px;
}

#left .ux-menu-sub
{
  position: absolute;
  width: auto !important;
}

#left .ux-menu-sub li
{
 white-space: nowrap;
}

#left .ux-menu,
#left .ux-menu li
{
  width: 100% !important;
}
```

_____

I have the same two problems as this poster, but I tried the code suggested, and it does not work for me.

I want to remove the arrow, and make items that have submenus the same length.

I also would like to change the background image for submenus.

Thank you

_____

Regarding your questions:

1. Remove the following custom CSS rule:

.ux-menu-container .ux-menu a
{
    width: 170px;
}

2. Use the next CSS rules:

/* background of sub-menu items */
.ux-menu-container .ux-menu .ux-menu-sub a
{
  background: red;
}

/* hover style */
.ux-menu-container .ux-menu .ux-menu-sub a:hover
{
  background: yellow;
}

_____

that didnt work for me.

Here is the code I have in there now:
```
.ux-menu-container .ux-menu A
{
 background: #768833 none;
 background-image: url(/images/navi_1.jpg);
 width: 170px;
 height: 12px;
}

.ux-menu-container .ux-menu A:hover,
.ux-menu-container .ux-menu A.ux-menu-link-hover
{
 background: #c3d389 none;
}

.ux-menu-container .ux-menu A.current
{
 background: #707070 none;
}

.highslide-container
{
 z-index: 20001 !important;
}

.highslide-container .outer-glow
{
 z-index: 20003 !important;
}
}
```

Everything there now were suggestions that solved previous issues with the menu.

I want to make the menu items that have sub menus the same width as normal menu items, and to remove the triangle image.

(Actually, I dont even mind the menu item being bigger, as much as i dont like the triangle)

If possible, I would like the sub menu to be over layed with a different image, (navi_2.jpg) - like the main menu is

_____

Use the following:

```
.ux-menu-container .ux-menu LI A SPAN.ux-menu-arrow
{
 display: none;
}

.ux-menu-container .ux-menu LI a.ux-menu-link-parent
{
```

```
 padding-right: 12px;
}
```
