
fixed length for horizontal submenu

Posted by gmichel0 - 2010/09/11 19:32

I have the same question as ashley: Can I make a fixed width for both the menu items and the submenus? I'd like the menu to take up the entire length? I'm using joomla template milky_way http://www.ari-soft.com/images/fbfiles/images/ausschnitt_menu.jpg

Add the following CSS rule:

```
#pillmenu .ux-menu a
{
  float: none;
}
```
