
Change background of main menu only

Posted by Ifish - 2010/09/13 02:56

Hello,

I want to make the background of my main menu transparent, but keep the current settings of the hover and submenus. I tried

```
.ux-menu-container .ux-menu A
{
    background: none;
}
```

But it changed the background to transparent for the main menu and the drop down menu. I only want to change the main menu. Can you help. The link to my site is:

http://www.diverseintellectual.com/vccs_new_site/index.php?option=com_content&view=article&id=25&Itemid=28

Thanks,
LF

Hello,

Use the following CSS rules:

```
.ux-menu-container .ux-menu a
{
    background: none;
}
```

```
.ux-menu-container .ux-menu .ux-menu-sub a
{
    background: url("images/menu-item-bg.png") repeat scroll 0 0 #F3EFEC;
}
```

Regards,
ARI Soft
