Menu in steps

Posted by willd3rbeast - 2010/09/15 23:13

_____

Hi, Ive just installed a Fresh Joomla site, without doing any modifications other than inserting your menu into the content instead of the menu..

Now it appears to have a stepping effect and large spacing when you click on a menu option.

have a look.

http://www.xvertex.com/P5A/

*Note - the article im using only has {loadposition client1} and no other html

_____

Hello,

This problem with HTML code around {loadposition client1} plugin code. Remove two tag and add the next CSS rule and everything will work fine:

table.contentpaneopen .ux-menu li
{
  margin-bottom: 0;
}

Sure thing, Ive indicated the spaces with yellow arrows.

www.xvertex.com/P5img/spaces.jpg

you can also check it out on the site

the menu is there but once you run the mouse over it the menus come out with spaces between them

_____

Add CSS rule from our previous post.

Regards,
ARI Soft
