## eliminating borders and backgrounds

Posted by armino - 2010/09/29 07:39

---

Hi there,

first of all: Thanks for this excellent piece of software!

I want to get rid of borders and backgrounds entirely. Here is my css:

```
.ux-menu-container .ux-menu a
{
  background:none;
  color: #eee;
  border-style:none;
  padding-left:50px;
  padding-right:50px;
}
```

However, there is one line left that shows after the last menu item.

Maybe there's a better way to align the menu into the containers width than the padding hack?

Thanks in advance,  
Armin

Hello,

Try to use the next CSS rule:

```
.ux-menu-container UL.ux-menu LI a
{
  background:none;
  color: #eee;
  border-style:none;
  padding-left:50px;
  padding-right:50px;
}
```

Regards,  
ARI Soft
