How to modify the size of the menu bar?
Posted by francosa - 2010/09/30 14:34

As I can make the menu bars are smaller in height?

Hello,

Try the following CSS rule:

```
.ux-menu-container .ux-menu LI a
{
 line-height: 10px;
}
```

Regards,
ARI Soft

Don't work :(
I keep seeing the same size

You can play with 'line-height' parameter. Reduce value of it that do menu items smaller.

Great!
It works perfectly, possibly made a mistake in the process the first time. Now it works perfectly.

Thanks again!

I see now that the menu that has submenu are larger than those without. I think it's because the image of the arrow, as it now is positioned almost at the bottom of the menu bar and not in the center as before shrink the size.

Add the following CSS rules:

```
.ux-menu-container .ux-menu LI A.ux-menu-link-parent
{
  padding: 10px 14px 8px;
}

.ux-menu-container .ux-menu LI A.ux-menu-link-parent SPAN.ux-menu-arrow
{
  top: 7px;
}
```

Thank you very much.
It works perfectly in this way.

```
.ux-menu-container .ux-menu LI A.ux-menu-link-parent SPAN.ux-menu-arrow
{
  top: 7px;
}
```

But the rest of the code is very useful too.

Thank you very much!
