
Sub-Menus not showing in firefox

Posted by jjaamm67 - 2010/10/08 17:43

Hi,

I have tried several solutions for this issue but they do not seem to work.

The sub-menus do not seem to come up in the horizontal position because of the image.

<http://miamifamily.net/>

Thanks for you help.

Hello,

Add the following CSS rules:

```
body .row-top-menu
{
  overflow: visible;
  height: 35px;
}
```

That did the trick.

Thank you so much.

where do i add the css codes? in the templates.css? pls help. greatly appreciated!

my site when open under firefox the submenu is being hidden under. Pls help.... have checked so many sites, but no help!

i have attached my template.css
www.ipctrsem.com/speedo/index.php <http://www.ari-soft.com/images/fbfiles/files/template.txt>

Hello,

Add the following CSS rule to 'CSS Styles' parameter in module settings or to site template CSS file:

```
.main .row-top-menu,  
.row-top-menu .corner-bottom-right  
{  
    overflow: visible;  
}
```
