
IE 7

Posted by mattDirt - 2010/10/08 20:42

OK so I said in my last post that I was all set but I just looked at my site in Adobe Browser Lab I am having and issue in IE7. It seems that the menu in ARI EXT and ARI YUI are still flush left. Is there any work around for this without messing anything else up?

xxxxxxxxxx

Use the following CSS rule for 'ARI Ext Menu':

```
#hometopnav .ux-menu-container .ux-menu
{
    zoom: 1;
    *display: inline;
}
```

and the next for 'ARI YUI Menu':

```
#homeSecnav .yuimenuubar
{
    zoom: 1;
    *display: inline;
}
```

Hi,
Can you check my code because the menu is still flush left?

xxxxxxxxxxxx

Thank you.

Try the following please:

```
#hometopnav .ux-menu-container .ux-menu
{
```

```
zoom: 1;
*display: inline !important;
}
```

and

```
#homeSecnav .yuimenubar
{
  zoom: 1;
  *display: inline !important;
}
```

If it doesn't help, provide temporary access to your Joomla! backend that we can investigate it.

Regards,
ARI Soft
