Width of the second sub menu
Posted by primoz - 2010/10/11 08:02
_____

Hi!
First of all thank you for the great tool!

I manage to fix the width of the menu, and the 1st sub-menu with the code:

.ux-menu-container .ux-menu a
{
  width:81px;
}
#{$id} .ux-menu-sub A
{
  width: 90px;
}

I would like to make exact width of the 2nd sub menu.

Can you please help me. http://www.ari-soft.com/images/fbfiles/images/width_of_2nd_sub_menu.jpg

Hello,

Provide link to page, please, where we can see the menu that we can help.

Regards,
ARI Soft

_____

Use the following CSS rule that define sub-menu width:

.ux-menu-container .ux-menu .ux-menu-sub LI
{
  width: 180px !important;
}
.ux-menu-container .ux-menu .ux-menu-sub LI A
{
  width: 146px !important;
}

Thank you very much!!!
That was so quick!!

Actualy works!

Is it possible to keep the width of the 1st sub menu unchanged (as shown in the picture) ??

Can there be a rule:
the width must be long at least 80px, but if needed longer?

_____

Use the following CSS rule that specify width of the first sub-menu:

```
.ux-menu-container .ux-menu LI.ux-menu-item-parent-pos0 .ux-menu-sub LI
{
  width: 125px !important;
}
.ux-menu-container .ux-menu LI.ux-menu-item-parent-pos0 .ux-menu-sub LI A
{
  width: 91px !important;
}
```

Regarding the second question, it's impossible.

Thanks a lot for your kindness.

The last post doesnt suits me, but the previous does!

Thanx for now.
I will do the rest of the site, and contact you latter if needed.
Wish you a nice day.
