rounded image backgrounds

Posted by matandmore - 2010/10/12 14:58

_____

Hi

I would like to have rounded images as bacground for the main menu and also would like to change the font?

Please can you help

Matt

_____

Hello,

Use the following CSS rule that define font family:

.ux-menu-container .ux-menu A
{
  font-family: Arial !important;
}

The module uses the following background images:

\modules\mod_ariextmenu\mod_ariextmenu\js\css\images\menu-item-bg.png

\modules\mod_ariextmenu\mod_ariextmenu\js\css\images\menu-item-bg-current.png

\modules\mod_ariextmenu\mod_ariextmenu\js\css\images\menu-item-bg-over.png

You can change it for your needs.

Regards,
ARI Soft

_____

hi

thanks. but what if i want to make the background images like button rounded shape which will chage depending on the length of the text inside? I cant just change those images then can I?

_____

It requires modification of HTML code of the module.

_____

I want to create menu with rounded corners too than can expand base on the length of text.

So how to modify the Html code to achieve this?

Can't use -moz-border-radius as IE do not recognize this. How to change ari menu to use rounded jpgs corners?

Thanks

_____

Hello,

HTML layout of the menu is created into /modules/mod_ariextmenu/mod_ariextmenu/templates/menu.html.php file. You can change it for your needs.

_____

Thanks for the quick response.

Do you have plans to release a version that will support rounded corners with hovering too?

Or is there a paid version?

_____

No, we don't have these plans. The module is absolutely free, open source and it provides possibility to adapt it for specific needs.

Regards,
ARI soft
