
Help... My submenus are being clipped...

Posted by lunatixcoder - 2010/10/13 12:06

My submenus on my horizontal menus are being clipped by my image gallery when you hover over them in Firefox and clipped completely in IE.

What do I need to fix. We are supposed to go live in a week. I've tried all the CSS mods posted in this forum.

:(

Hello,

This problem with Flash object on the page. Use wmode="transparent" attribute instead of wmode="window" for this Flash object.

Regards,
ARI Soft

WOW! I've never received such a quick and accurate response! Fantastic customer support!

Thanks it worked like a charm!
