
Can I Word Wrap Menu Items

Posted by mcracco - 2010/10/13 13:00

Just installed this module and it is working great. Thanks!

My only issue is some of my menu labels are a bit lengthy. The Joomla default module would wrap long labels into 2 lines and life was good.

ARI Menu doesn't wrap the lines and they just extend to the right and overlap text in the body of the page. I have abbreviated as best I can but things are starting to get cryptic.

Any way to split a label into 2 lines?

Hello,

Sorry, but the module doesn't provide this ability.

Regards,
ARI Soft

:(Bummer. But the rest of the functionality is so good I guess I can't complain.

Thanks for the quick response...
