We suppose this conflict with "Super Sized" extension because it hides all elements till page loads. We have updated the module. Download, upgrade it and set 'Load Method' parameter to 'Load'. It can help to resolve this issue.

Dear,

so, it works !

but, if you look at projet -> legende d'automne, you'll see that legende d'automne is in two line,
is it possible to write it on the same line?

Actually, on safari, it works perfect, you see legende d'automne and le conte
but on ff you see :

legende
d'automne

and

le
conte
