
Vertical menu with no Submenus

Posted by mygalaxy - 2010/10/20 06:09

Not sure what CSS code to add for vertical submenu items to appear. Appreciate your help!

Hello,

Add the following CSS rules:

```
.column ul.ux-menu li,  
body #Mod61 .ja-box-ct,  
#ja-left .ja-col,  
#ja-left  
{  
    overflow: visible;  
}
```

```
div.ja-moduletable .ux-menu-container ul,  
.column ul.ux-menu li  
{  
    margin: 0;  
    padding: 0;  
}
```

Regards,
ARI Soft
