
Style submenu

Posted by deon_jonker - 2010/10/20 11:19

Hi,

Is it possible to style the submenu only? I don't want to change the style of the top menu, only the submenu.

PS. I am developing on my localhost and I'm creating a custom template for the Joomla site.
I just need to know how to implement your module in my CSS styles!

Thanks in advance.

Oh, great module. I've tried dozens of other menu modules, but none of them met my needs the way yours does. :)

Hello,

Yes, use the following CSS rules for this:

```
/* sub-menu container */
.ux-menu UL.ux-menu-sub {}
```

```
/* sub-menu item */
.ux-menu UL.ux-menu-sub LI {}
```

```
/* sub-menu link item */
.ux-menu UL.ux-menu-sub LI A {}
```

```
/* hover style for sub-menu link item */
.ux-menu UL.ux-menu-sub LI A.ux-menu-link-hover,
.ux-menu UL.ux-menu-sub LI A:hover,
.ux-menu UL.ux-menu-sub LI A:focus {}
```

Regards,
ARI Soft

Thanks a million!
Worked like a charm. :)
