
Link submenu

Posted by Shizzel - 2010/10/31 20:43

Hello world!

I made a vertical menu using ARI ext, and each menu/submenu title is linked to another article on my website, and I was wondering if I could disable linking partially to the article. I want the Accommodations tab to have no link without losing the submenu, how can I do this?

Hello,

Set "Separator" menu item type for "Accomodations" and "Gites" menu items.

Regards,
ARI Soft
